

Comp 199 Weekly Report Group 8

Week 3 (4/20 - 4/26)

Team Leader Toshiyasu Akazawa

Team Member Pasha Bolokhov, Candise/Xinlei Wang

1. Reference to Gantt chart

We worked along Gantt chart for week 3 and week 4. The works are designing database, the layout of website, and red for the database.

2. Summary

This week was almost preparation for the project. Setting the environment for developing, designing the database and the layout of the website. Thus, in this week, we had meeting every day and work together. On Gantt chart, we work every things except for “insert sample data”

3. Problems and Solutions

Some problems appear. We find that we have to prepare and manipulate huge data. To solve the problems need more time to simplify the data and to improve. Or we need to specific example data, not too general, and need to discuss about it more.

4. Summary of the members' works for the week

In the week, we had meeting every day, Pasha worked for the blue print of the data base constructor, and Candise worked for deigning the layout of the website. Each member set up Git and Microsoft Project on each own computers. Our group uses Google Drive to share the information documents.
