Comp 199 Weekly Report Group 8

Week 9 (6/1 – 6/5)

Team Leader Candise/Xinlei Wang

Team Member Pasha Bolokhov, Toshiyasu Akazawa

1. Reference to Gantt chart

This week's tasks in Gantt chart are to complete payment function through Paypal.

2. Summary

In the week, we are working on the implementation of paypal function and other improvement of user experience for profile page, especially about the security of profile modification accessibility.

3. Problems and Solutions

In the profile page, after modifying their information, customers are forced to log out and to sign in again to make sure updated $token(re-generating a token). But as in really life this is not convenient for customers, we are think about to bring this updating process to backend and make it no need to sign in again after changing their profile.

4. Summary of the members' works for the week

In the week, Pasha updated the Paypal SDK and solve the redirectory problem. Toshi and I worked on upgrading the security of customer profile relation function. I am working on the draft presentation PPT and we will review and refine a final version together.

5. Next Week's Tasks

To finish final presentation.
